Cold case

Veel aanwijzingen over gevoeligheid voor piping in het veld

Laboratorium

$$\frac{H}{L} = \frac{1}{c} = F_R F_S F_G$$

$$F_R = \eta \frac{\gamma'_p}{\gamma_w} \tan \vartheta \left(\frac{RD}{RD_m} \right)^{0.35} \left(\frac{U}{U_m} \right)^{0.13} \left(\frac{KAS}{KAS_m} \right)^{-0.02}$$

$$F_S = \frac{d_{70}}{\sqrt[3]{\kappa L}} \left(\frac{d_{70m}}{d_{70}} \right)^{0.6}$$

$$F_G = 0.91 \left(\frac{D}{L} \right)^{\frac{0.28}{2.8} + 0.04} \left(\frac{D}{L} \right)^{-1}$$

Nu

$$\frac{H}{L} = \frac{1}{c} = F_R F_S F_G$$

$$F_R = \eta \frac{\gamma'_p}{\gamma_w} \tan \vartheta \left(\frac{RD}{RD_m} \right)^{0.35} \left(\frac{U}{U_m} \right)^{0.13} \left(\frac{KAS}{KAS_m} \right)^{-0.02}$$

$$F_S = \frac{d_{70}}{\sqrt[3]{\kappa L}} \left(\frac{d_{70m}}{d_{70}} \right)^{0.6}$$

$$F_G = 0.91 \left(\frac{D}{L} \right)^{\frac{0.28}{\left(\frac{D}{L} \right)^{2.8} - 1} + 0.04}$$

zoeken in veld naar modelparameters

Toekomst

$$\frac{H}{L} = \frac{1}{c} = F_R F_S F_G$$

$$F_R = \eta \frac{\gamma'_p}{\gamma_w} \tan \vartheta \left(\frac{RD}{RD_m} \right)^{0.35} \left(\frac{U}{U_m} \right)^{0.13} \left(\frac{KAS}{KAS_m} \right)^{-0.02}$$

$$F_S = \frac{d_{70}}{\sqrt[3]{\kappa L}} \left(\frac{d_{70m}}{d_{70}} \right)^{0.6}$$

$$F_G = 0.91 \left(\frac{D}{L} \right)^{\frac{0.28}{\left(\frac{D}{L} \right)^{2.8} - 1} + 0.04}$$

parameters uit veld vertalen naar model

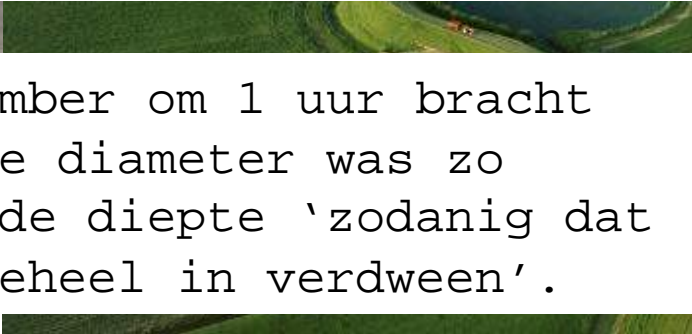

Historische dijkdoorbraken

- Bij veel historische dijkdoorbraken piping verdacht mechanisme
- Veel informatie in ondergrond en archieven

"De dijk waarvan de kruin al spoedig verdween (\pm 9.15 uur) bleek zoals de dijkgraaf mededeelde reeds sinds den vorigen dag sterk te kwellen, welke kwel, vermoedelijk een mollegat op eenige diepte beneden de kruin, na eerst steeds grooter afmetingen te hebben aangenomen, oorzaak der breuk werd."

"In de nacht van 29 op 30 december om 1 uur bracht de wel veel zand naar boven, de diameter was zo groot 'als een kachelpijp' en de diepte 'zodanig dat een lange frambozenstruik er geheel in verdween'."

Voorbeeld: Cold cases

Recente doorbraken in buitenland

- Wat voor afzetting
- Dikte zandpakket
- Korrelgrootten
- Heterogeniteit
- Maximale kwelweg
- Dikte deklaag
- Afwijking ten opzichte van omgeving
- Randvoorwaarden

The truth is out there
